SECTOR ALLOCATION

INVESTMENT APPROACH & COMMENTARY

First Avenue is a valuation-driven equity manager. The objective of our investment style is to grow our clients' wealth through the consistent application of our investment philosophy and process over long periods of time. We list below the simultaneous conditions necessary for this outcome to materialize.

1. We forgo opportunity to outperform the market during periods of over-valuation (momentum): These are periods when: (i) most securities on the market do not reflect sufficient margins of safety, and (ii) the psychological and emotional make-up of investors who dominate market activity is one of valuing one's gains more than one's losses. We refer to our results during this period as our pain trade.

2. Our clients stay with us for extended periods of time: By foregoing momentum related returns, investors in our funds appreciate our ability to: (i) avoid significant capital losses when the stock market corrects from over-valuation (momentum), and (ii) continue to grow from a higher base than a market-corrected level. This phenomenon is referred to as compounding.
